

**“PIPE UP”
AND HELP
US GET THE
LEAD OUT!**

We are committed to providing our citizens with a **safe and reliable water supply.**

The Environmental Protection Agency (EPA) has established the Lead and Copper Rule (LCR) to protect public health and reduce exposure to lead and copper in drinking water. It is estimated that there are between 6 to 10 million lead service lines still in existence in our country. **The primary source of lead in drinking water, when present, is **pipes**.**

To help us determine whether your home might have lead-containing plumbing materials and if further testing is recommended—**we need your help**. Simply scan the QR code below using your smartphone’s camera or QR code reader app—or visit the website at the URL provided below—to participate in a brief survey.

Your participation is greatly appreciated and your input is vitally important.

**PARTICIPATE IN OUR
BRIEF SURVEY AT**
